

SpeedMathsGames — Admin Screens (v1)

Generated: July 30, 2025, 03:23 AM IST

Admin Home

- Menu: Topic Configs, Presets, Analytics Overview.
- Auth guard placeholder: restrict to Admins when auth is enabled.

Topic Configs

- List of topics with status (active/inactive), version, last updated.
- Edit screen: JSON editor with schema validation (ranges, digits, ops).
- Validation tab: per-topic controls (decimals exact dp, fractions in lowest terms, BODMAS rounding).
- Actions: Save draft, Publish (version++), Rollback to prior version.

Presets

- List presets: name, description, duration, topic mix, validation defaults.
- Create/Edit: form + JSON view; test preview to generate 3–5 sample questions.
- Actions: Save, Duplicate, Archive.

Analytics Overview

- KPIs: Total games, Active users (7/30d), Avg accuracy/time by topic.
- Charts: trend lines; top weak topics; effect of difficulty changes.
- Export CSV for further analysis.

Leaderboard Moderation

- View top scores by scope/topic; flag outliers (very low avg time, high score).
- Manual hide/restore entries; reason log.
